Heat and Energy	<p>Iron freezes at -1538 degrees Celsius and boils at 2862 degrees Celsius.</p> <p>The temperature of a lightning bolt is 30,000 degrees Celsius.</p> <p>The wire inside a light bulb is 2500 degrees Celsius.</p>	<p>I was not surprised to hear about the boiling point, but the freezing point did surprise me. I never thought that iron would really be able to freeze. I wonder about other metals.</p> <p>Wow! I never really thought about lightning even having a temperature. 30,000 degrees Celsius is really high.</p> <p>I wonder how much energy it would take to light up a light bulb.</p>
